

Penny Moss

Associate

Testament to her best-in-class knowledge and expertise, in October 2020, Penny was appointed as an Expert on the Government's High Streets Task Force. The Task Force provides support, guidance and networking opportunities for local authorities and communities, to help the nation meet the challenge of transforming our high streets.

BA (Hons) Geography – Durham University

MPhil Environmental Planning and Development – University of Reading

Member of the Royal Town Planning Institute

Penny has over fifteen years' experience in the private sector working for retailers, developers and fund managers. Her experience includes mixed-use town centre redevelopment as well as retail warehouse developments providing advice on development options and longer-term asset management issues.

Testament to her best-in-class knowledge and expertise, in October 2020, Penny was appointed as an Expert on the Government's High Streets Task Force. The Task Force provides support, guidance and networking opportunities for local authorities and communities, to help the nation meet the challenge of transforming our high streets.

Penny has worked on projects across the country and has a good track record of working with local authorities to achieve a positive result. She has rationalised some of the most significant retail schemes to be brought forward in London over the past decade to the satisfaction of both the relevant local authorities and the GLA.

Prior to joining Planning Potential, Penny worked for a property partnership and an international, multi-disciplinary environment consultancy working on large scale retail schemes across the UK and Ireland.

When not at work Penny can generally be found either out on her bike being a veteran of Cycle to MIPIM and pedElle, playing in the Epsom and Ewell Silver Band, or trying to convince her cat HRH (who has his own Twitter account) to cooperate.
